

**How many children are
victims of technological and
pharmaceutical targeting?**

CARE

For the Children

It hurts to even think of the ways that defenseless, little children are being targeted, with microwave and laser weapons, as well as their aiding pharmaceuticals.

**Children Truly ARE our future
and its up to us to keep them safe.**

- 1. Educate yourself**
- 2. Take action to stop the targeting**
- 3. Take protective measures**
